

Global eTraining

Learn Faster. Retain More. Save Time.

About the platform

Global eTraining (GeT) offers on-demand access to the largest AEC and manufacturing content library, built to help elevate technical skills to elevate technology adoption. The content is authored by industry experts and hosted in a platform that offers complete personalization to increase engagement and retention. GeT's strength lies in their ability to support customization through their course builder, The Generator, which gives users the power to edit and include GeT courses and create unique company and project-specific content that can be hosted on any Learning Management System (LMS) and translated into any language. Users can repurpose pre-existing PDFs, videos, PowerPoints and SCORM files, which can be quickly converted to interactive and trackable courses. GeT helps drastically cut down on content creation time with AI-powered course creation and auto-narration abilities. Organizations are supported with powerful analytics to promote data-driven decisions and prove training ROI, as well as a dedicated Customer Success team for strategic recommendations and efficient onboarding. The GeT platform is built to elevate technology adoption, and remains the fastest way to create, maintain and share effective technical training.

What they offer

Global eTraining's Business Plus plan pairs with an Autodesk Enterprise Business Agreement. The Business Plus plan includes access to the GeT Everything course library, The Generator custom course builder, a learning management system provided by Absorb LMS, GeT Know-How Autodesk plugin and a powerful administrative and reporting platform. Users are able to translate content into any language and can add-on cutting-edge AI-powered course creation and auto-narration tools. Business Plus customers are also supported by a top-of-the-line, dedicated Customer Success team to optimize training, expedite onboarding, drive adoption and support in achieving business objectives. GeT helps bridge the gap between learning & development and tech teams, acting as a single source of truth for company-wide tracking, updates and skills management, with a consistent goal of driving technology adoption through effective technical training.

Highlighted features

Customizable knowledge management platform

GeT's platform is composed of a brandable and secure LMS loaded with their robust training library, executive dashboards, a custom course builder, skills gap assessment solutions and personalizable learning paths. AI-powered course creation can also be included to generate custom training in seconds.

Proven ROI and training adoption

Global eTraining's robust tracking and reporting dashboards allow for data-driven decisions, with insights into individual learner's skills gaps and company-wide training success and ROI. Dedicated Customer Success teams offer optimization recommendations, onboarding support and will act as an extension of the account team with a focus to elevate technical skills and technology adoption.

Flexible content creation hosted on any LMS

In addition to gaining access to AEC and manufacturing's largest training library, users can customize pre-existing GeT content or create their own course content, workflows, quizzes and learning paths with The Generator custom course builder and AI-powered course creation. Custom content can be hosted and updated instantly across any or multiple LMS', branded to align with company standards and seamlessly translated into any language.

Waterfall updates and proven learning methodology

GeT content is updated in lockstep with Autodesk and industry standards as part of their Waterfall Release method. All content can be personalized across visual, auditory, read/write and kinesthetic learning styles, ensuring optimal training retention.

Certifications

GeT effectively prepares users to pass their Autodesk Professional Certification and offers Autodesk Authorized Training Center (ATC) Certificates of Completion, Building Transformations (CanBIM) Certification, BuildingSMART Certification and OSHA Certification. GeT also supports many continuing education and professional development credits recognized by industry associations.

Globally recognized

Global eTraining is proud to be Construction Tech Review's 'Top eTraining Platform' and has sold millions of courses to learners in over 150 countries.
